

Mathematics. Measuring.

Using a 1 cup measuring cup to measure ingredients to make Jelly.

Choose any flavour or type of jelly you prefer.
Place jelly crystals into a jug
Measure 1 cup of boiling water and pour into the jug.
Stir jelly until all the crystals are dissolved.
Measure 1 cup of cold water and pour it into the jug.
Stir until combined
Pour the jelly into 4 small cups (125g with lids) or a bowl.
Place into the fridge overnight to set.
Enjoy by itself or with ice cream.
