

Shaving Foam Marbling

Equipment:

- Shaving foam (not gel)
- Shallow container like a baking dish
- Spatula
- Paint or food colouring
- Paint brush or dropper
- Something to use as a scraper (ruler or piece of cardboard)
- Thick paper or cardboard (A4 cut in half or quarters)

Instructions:

- Spray shaving foam into the container and smooth with a spatula
- Using brush or dropper put blobs of paint or drops of food colour onto the shaving foam
- Swirl the colours through with a straw, pop stick, skewer or butter knife to create a 'marble' effect
- Gently press a piece of paper or cardboard onto the shaving foam and lift it back off
- Scrape the shaving foam off the paper with a ruler or firm piece of cardboard and put your print aside to dry
- Keep creating more prints by adding extra colour or shaving foam to your dish as needed

Ideas:

- Use a plastic tablecloth underneath or use an outdoor area
- Keep a wet washcloth handy for clean up
