

## Plastic Bag Print

### Equipment:

- Plastic bag (zip-lock or shopping bag)
- Paper
- Markers
- Spray bottle (water)

### Instructions:

- Colour the plastic bag with ordinary markers (not permanent)
- Lightly spray the bag with water
- Press your paper down onto the paper bag so it absorbs the water and colour then peel off and allow it to dry

### Ideas:

- This can also work with aluminium foil instead of a plastic bag
- Try using a sharpie or permanent marker to draw a picture on the bag before colouring it. What happens to the picture when it transfers onto the paper?
- You can also do this with paint if you have some (you won't need to spray it with water)
