

Foil Sculptures

Equipment:

- Aluminium foil
- Scissors

Instructions:

- Tear a large sheet of foil
- Cut from the middle of one edge to 1/3 of the way towards the center, these are the 'legs'.
- Scrunch the foil into two legs, then scrunch the rest of the body and a head.
- Tear another smaller piece of foil and scrunch it into one long piece for the arms, then wrap it around the torso, cutting the arms to length if too long.
- Fold the ends of the arms and legs to make hands and feet.

Ideas:

- Move your person into different positions or have someone stand in a position and copy it with your person
- Lay it on paper and trace each one
- Add objects to the person with foil, sticky tape or rubber bands
- Make a family of foil people and act out a scene with them
- Display your foil people around the house using their hands and feet to hang from things
- Create other figures – a dog, cat, giraffe or even a spider!
