

Mathematics. Measuring.

Using measuring cups and spoons to measure ingredients to make Pancakes.

Measure 1 cup flour and tip it into a bowl. Measure 1 teaspoon of sugar and tip it into the bowl. Add a pinch of salt and 1 egg into a bowl.

Measure 1 and 1/2 cups of milk and gradually add it to the other ingredients and until smooth.

Heat frying pan. Spray frying pan with cooking oil or place a small amount of margarine into frying pan to stop the mixture sticking.

Pour the mixture into a jug (makes it easier to pour). Pour small amounts of mixture into frying pan. Cook until bubbles come to the surface and break. Carefully turn over pancake and cook until brown. Repeat cooking instructions until all mixture is used.

Serve with butter, jam and cream or any toppings you like (Nutella, strawberries and cream).
