

Label the parts of the helmet.

Name _____

straps	hard outer shell	helmet liner	ventilation holes	buckle
--------	------------------	--------------	-------------------	--------

Match the label to its function

straps	helps to protect your head if you fall.
hard outer shell	help your head to stay cool.
helmet liner	should be adjusted so the helmet is comfortable, snug and level on your head.
ventilation holes	needs to be clipped up firmly to keep your helmet in the right position.
buckle	helps to cushion your skull and protect your brain from injury if you fall.
